EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Thomas Kelton (Reg. # 54,214) on September 30, 2005.

3. Claims 35 through 53 have been cancelled.

4. Claims 1-34 are allowed.

5. The following is an examiner's statement of reasons for allowance:

The Examiner has not found a router containing an egress queuing structure with parallel queues wherein the parallel queues are interconnected with each other and to a common shared memory device and a queue congestion processor interconnected with the input terminals of all of the parallel queues and an output selection block interconnected with all the output terminals of all the parallel queues further interconnected to an egress arbitration processor.

The closest art of record, Sriram (USP 5,463,620), performs similar, yet distinctly different, functions. Sriram has parallel queues, allocates bandwidth to the parallel queues [by QOS/COS], multiplexes the output, but fails (1) to perform congestion control on the inputs of the parallel queues, (2) to dynamically reallocate unused bandwidth, and (3) to interconnect the parallel queues with each other on a common shared memory device.

Aatresh (USP 6,067,301), can dynamically reallocate unused bandwidth but fails to (1) to perform congestion control on the inputs of the parallel queues, and (2) to affirmatively interconnect the parallel queues with each other on a common shared memory device. Wu (USP 6,477,167) also dynamically reallocates unused bandwidth, but also fails to (1) to perform congestion control on the inputs of the parallel queues, and (2) to affirmatively interconnect the parallel queues with each other on a common shared memory device. Moreover, Jeong (6,671,597), performs input traffic management, and output traffic processing, but fails to interconnect the input traffic management processing to all the parallel queues as well as fails to interconnect all the parallel queues with each other on a common shared memory device [Fig. 8].

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Mais whose telephone number is (571) 272-3138. The examiner can normally be reached on 6:00-4:30.

8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin can be reached on (571) 272-3134. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
